<b>Traviata</b>	<b>Dark Red – C</b>
<b>Twilight Zone</b>	<b>Deep Velvet Purple – F</b>
<b>Uptown Girl</b>	<b>Coral Pink – F</b>
Veteran’s Honor	Bright Red

### WATERING

**NOTE:** Be sure to deeply water the rose every third day for the first week, using Superthrive™ or Vitamin B-1. **Mist the rose with water several times per day until it starts to leaf out (2-3 weeks)**

Gradually reduce the water frequency over the next few weeks allowing the soil to dry one inch deep between watering. The actual frequency will depend on the weather and your individual location. Check the soil every few days by scratching around the base of the rose. Always water deeply enough to soak through the entire hole. Adjust watering frequency throughout the year to compensate for weather changes.

### Berridge Nurseries Guarantee

**Berridge Nurseries will issue a merchandise credit for 1/2 of the purchase price of any bare root rose that fails to leaf out and grow within 90 days. Please save your receipt and dead plant for claiming credit under our guarantee.**

Royal Gold	Yellow

## PLANTING

Always soak bare-root roses by placing the entire plant under water with Superthrive™ or Vitamin B-1 added for at least one hour and up to 24 hours prior to planting.

- In normal soil dig a hole eighteen inches deep and two to three feet across. In compacted soil or soil where caliche is present, dig two to three feet deep and mix one third cup of sulfur and one cup gypsum into the soil at the bottom of the hole.

- Mix one half of the original soil with an equal amount of compost (mix in a shovel full or two of sand if compacted soil is present) and backfill hole about half way. Build a cone of the planting mix; blend with a cup of **BERRIDGE NURSERIES ROSE FOOD or Bone and Blood Meal**. The cone should be built to shape for the roots of the individual rose to be spread over without forcing them. Set the rose's height so the bud union will be above ground.
- Fill the rest of the hole with the planting blend and another cup or two of **BERRIDGE NURSERIES ROSE FOOD or Bone and Blood Meal**. Firmly pack the soil around the base of the plant. Leave a slight depression in the soil to create a water basin.
- Fill the basin with water and poke the hose gently around the soil to eliminate any possible air pockets. Allow the water to soak in and adjust the rose in the soil if it has settled. Fill the basin again using the same water formula the roses were soaked with.

For All Seasons  
Since 1938
